* Special categories of cited documents:

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

- *T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- *Y* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
- *&* document member of the same patent family

INTERNATIONAL SEARCH REPORT

PCT/NL 03/00728

Box I Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)

This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☒ Claims Nos.: 9-12, 13-15, 16-18, 23, 24
because they relate to subject matter not required to be searched by this Authority, namely:
see FURTHER INFORMATION sheet PCT/ISA/210
2. ☐ Claims Nos.:
because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
3. ☐ Claims Nos.:
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box II Observations where unity of invention is lacking (Continuation of item 2 of first sheet)

This International Searching Authority found multiple inventions in this International application, as follows:

1. ☐ As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.
- ☐ No protest accompanied the payment of additional search fees.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

Continuation of Box I.1

Claims Nos.: 9-12, 13-15, 16-18, 23, 24

For the following reasons, claims 9 - 12, 13 - 15, 16 - 18 and 23, 24 do not meet the requirements of Rule 39.1(iv) PCT:

Claims 9 and 23 specify:

- werkwijze voor de detectie van een ziekte in een zoogdier...

Hence, claims 9 and 23 specify a diagnostic method practised on the human or animal body. Therefore, claims 9 'and claims 10 - 12, dependent thereupon! and 23 'and claim 24, dependent thereupon! do not meet the requirements of Rule 39.1(iv) PCT, and are excluded from patentability.

Claim 13 specifies:

- werkwijze voor het vervaardigen van een verschilprofiel voor de detectie van een ziekte in een zoogdier...

Hence, claim 13 specifies steps incorporated in a diagnostic method, and as such is part of a diagnostic method. Therefore, also claim 13 'and claims 14, 15, dependent thereupon! do not meet the requirements of Rule 39.1(iv) PCT, and are excluded from patentability.

Claim 16 specifies:

- werkwijze voor het identificeren van een biomarker voor een ziekte...

Hence, claim 16 specifies steps incorporated in a diagnostic method, and as such is part of a diagnostic method. Therefore, also claim 16 'and claims 17, 18, dependent thereupon! do not meet the requirements of Rule 39.1(iv) PCT, and are excluded from patentability.

Since these claims specify a diagnostic method practised on the human or animal body, they do not meet the requirements of the Article and Rules mentioned above, and consequently, they are not allowable under Article 34(4)(a)(I), Rule 39.1(iv) and Rule 67.1(iv) PCT. The subject-matter of these claims has not been searched.
